Toll Project Intake Checklist

Fill this out before requesting a quote. The more complete it is, the faster we can tell you whether a project is a fit.

1. The material

- [ ] Ingredient name, grade and safety data sheet
- [ ] What the material is used for, and the finished format (powder, tablet, capsule, etc.)

2. The service

- [ ] Which service: blend, sift, mill, granulate, dissolve, or test only
- [ ] Target particle size (D50, D90, or mesh), or the problem to solve

  Grit, dust, caking, poor flow, slow dissolution, or a spec that is not being met

3. Volume and timeline

- [ ] Expected volume per run, and per year
- [ ] Target timeline and ship-to location

  A first project runs longer than a repeat one; tell us if this is a trial or ongoing

4. Packaging and labeling

- [ ] Package type and net weight
- [ ] Allergen, organic, kosher, halal or other label constraints

5. Sample

- [ ] A representative sample of the actual material, not a generic grade

  This is what lets us trial on your real material rather than estimate

Send this to info@nutrashore.com, or fill out the web version at
